DAVID RICHO

Everything Ablaze: Meditating on the Mystical Vision of Teilhard de Chardin

Contemporary interest in Teilhard's work manifests the evolutionary mysticism he taught and forecast, and which we can apply to our daily life. This is conscious evolution, a presence in the world as members of Christ's body. Indeed, we are alive today to co-create—through Him, with Him, in Him, and as Him—the future that Christ came to proclaim. A meditative focus on Teilhard's words opens us to the mysterious forces in the universe that continually reveal God's face.
